Letter "Eagle on the Top", Valentina V. Gonchar

"Eagle on the Top" is making from one sheet with sides ratio 1:2. If we have dichromatic paper (e.g. one side is white, and other - violet), then first we must make decision for Eagle color - white or colored. If Eagle will be white then top (rock) will be colored and we must begin our work from white side of paper. And vice-versa. Our Eagle is white.

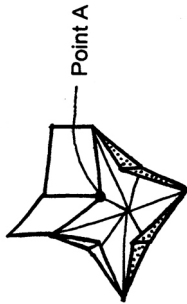

If we partially unfold bottom leaves, then we can install figure on the table

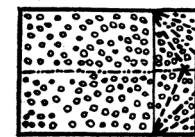

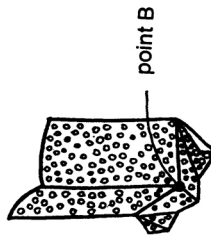

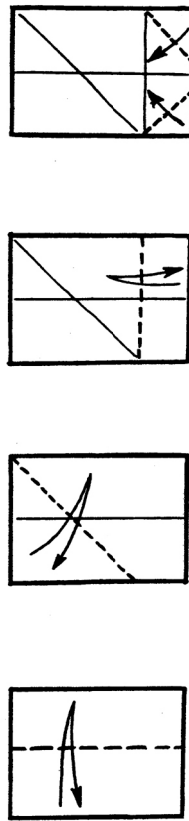

"Eagle on the Top" from two A4 sheet

Folding "Eagle on the Top" from two A4 sheets supposed free color choice for Eagle and for the Top.

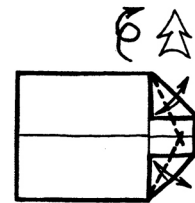

Let's take sheet with color of Eagle and put it on the table by face side upwards and do first 10 items (as for Eagle on the Top from one sheet). Mark A point.

Take sheet with color of Top and put it down on the table back up and turn up so that top side of the sheet lie on its side.

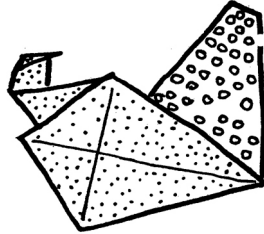

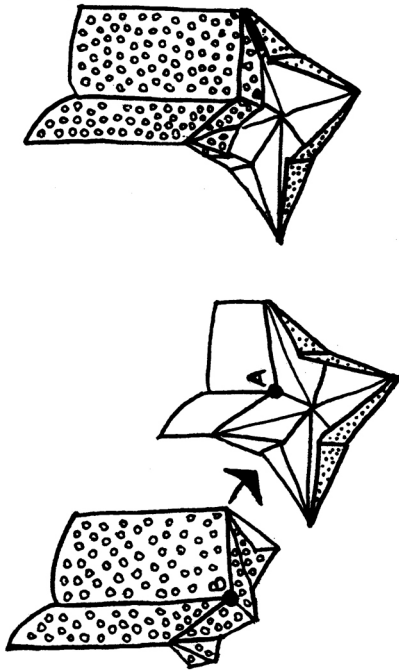

Make pointed folds

To nest sheet with color of Top in sheet with color of Eagle, consisting point A (on sheet with color of Eagle) with point B (on sheet with color of Top) and folds

Then fold as in model "Eagle on the Top" from one sheet, starting from item number 10 to 33.

For transformation our model to letter we need to lift up the wing, extract part of the "rock" and write something for our friends on straighten rectangle. Then, using of existing folds, we need fold rectangle, put in "rock" and put down wing.
